upwork.com/freelancers/ahmad23 | github.com/AKC23

Skills

Data Analytics & Business Intelligence: Microsoft Power BI, Tableau, Looker Studio / Google Data Studio, Power Query, Data Modeling, Data Wrangling, Data Cleaning, Reporting, KPIs, Business Insights, Databricks, Google Analytics (GA4), Google Cloud Platform (BigQuery), Microsoft Azure

Excel & Data Processing: Pivot Tables, Power Pivot, Data Wrangling, Data Filtering, Data Validation

Automation & Workflow Optimization: n8n, Make.com, Zapier, Google App Script, Microsoft Power Automate, API Integration

CRM Systems: Customer Data Management, Optimization, Reporting

Python: Pandas, NumPy, Scikit-learn, SciPy, Matplotlib, Seaborn, Data Preprocessing, Statistical Analysis, Hypothesis Testing, Jupyter Notebooks, Docker, Git, Machine Learning

Communication & Collaboration: Strong verbal & written communication in English, Team Collaboration, Cross-functional Teamwork, Reporting Insights to Stakeholders

Experience

Freelance Data Analyst & Visualization Expert (Top Rated) April 2025 – Ongoing
Upwork Profile Link: https://www.upwork.com/freelancers/~014330e592a3028571 *Remote*

- Performed data analysis for an Austrian eCommerce client, uncovering insights such as declining retention (12.66% to 4.88%), discount inefficiencies, subscriber engagement gaps, and key revenue drivers. Developed automated Looker Studio dashboards to visualize critical KPIs, including customer retention, churn rate, cohort behavior, AOV, LTV, and revenue trends, using BigQuery and Google Analytics 4 (GA4), empowering strategic decisions for Q4 performance and VIP customer targeting.
- Built an interactive Power BI dashboard consolidating $26.6M in transactions across 5 business classes for a maritime services client, reducing AR aging beyond 60 days by 22% and cutting monthly close reporting from 10+ hours to under 1 hour. Dashboard enabled leadership to reallocate $8.4M in working capital more efficiently across seasonal operations.
- Integrated the CME FedWatch API into Looker Studio for Tradars.com, creating an automated financial analytics dashboard that tracked rate probabilities, policy rates, and yield differentials across G10 countries, providing real-time insights into global financial markets. Designed dynamic visualizations, including pie and bar charts, to support informed decision-making for traders using institutional-grade data.

Data Analyst & Database Developer (Contractual) October 2024 – March 2025
Innovision Consulting Private Limited *Dhaka, Bangladesh*

- Collaborated with Global Alliance for Improved Nutrition (GAIN) under the Data Analytics and Emerging Frontiers Department to develop a scalable analytics platform, leveraging SQL and Power BI to track edible oil and wheat flour supply chains in Bangladesh.
- Extracted, cleaned, and transformed multi-source raw data into structured formats, enabling seamless integration into SQL databases and readiness for analytical and visual reporting.
- Performed data wrangling, preprocessing, and exploratory data analysis (EDA) to identify key trends, anomalies, and performance metrics that informed data-driven decision-making.
- Applied robust data validation and integrity checks to ensure high-quality datasets for accurate visualizations and scalability, aligning with the project's future international deployment.

Projects

eCommerce Data Analysis: Retention, Revenue & Performance Insights June 2025
Project Link: github.com/AKC23/Looker-Studio-Projects | kaggle.com/code/ahmadulkc/ecommerce-data-analysis

- Developed a real-time Looker Studio dashboard for an Upwork client covering year-over-year revenue, average order value, and retention analysis, revealing that VIP & high-CLV customers drive 46.49% of revenue and that discount strategies hurt profitability.
- Conducted customer cohort and retention analysis, uncovering a significant retention drop (12.66% to 4.88%) in 2025, urging churn mitigation and improved segmentation strategies.

Mapping Violence Against Women in Bangladesh Apr 2025
Project Link: public.tableau.com/app/profile/ahmadul/viz/ViolenceAgainstWomen

- Developed an interactive Tableau Public dashboard to visualize gender-based violence (GBV) in Bangladesh, revealing regional disparities and highlighting controlling behavior as the most common form of intimate partner violence (IPV).
- Identified high IPV rates in Barishal, Khulna, and Chattogram, emphasizing the need for policy interventions and public awareness in disaster-prone areas, with data from BBS, VAW Survey 2024.

Impact of Disasters at Educational Institutions in Bangladesh (2021 & 2023) July 2024
Project Link: lookerstudio.google.com/reporting/e3c9abf2-71b1-467f-8779-d3fb83bc8ae8

- Developed an interactive Looker Studio dashboard to visualize climate change impact, focusing on student dropouts, infrastructure damage, and disaster response measures.
- Performed data cleaning and text analysis using SQL and Excel, and used bar charts and filters to compare impact across institutions, gender, and mitigation efforts, with data from BANBEIS.

Visualizing Sales Trends: An Interactive Dashboard (2023) Mar 2024 – Apr 2024

Project Link: github.com/AKC23/Microsoft-Power-BI-Projects

- Developed a Sales Performance Dashboard in Power BI with pie charts, tables, card visuals, slicers, gauges, and maps, enhanced with conditional formatting for clarity and usability.
- Delivered insights into monthly performance, currency comparison, and regional sales distribution, helping the sales team make informed decisions.

Institutional Mapping Across Bangladesh: Education Data (2023) Nov 2023

Project Link: github.com/AKC23/Microsoft-Power-BI-Projects

- Developed an interactive Power BI dashboard using 2023 BBS data, visualizing schools, colleges, and madrasas via column charts, waffle charts, donut charts, and maps.
- Provided a comprehensive analysis of the educational landscape, showing institutional distribution and key metrics across Bangladesh for data-driven decision-making.

House Price Analysis in Bangladesh — ML Models — XAI July 2023 – Sept 2023

Project Link: kaggle.com/code/ahmadulkc (ML Models) | kaggle.com/code/ahmadulkc (XAI)

- Collaborated with AUST lecturers in a 4-member team for 3 months to build regression models on the Bproperty Kaggle dataset, focusing on regional price trends, popular neighborhoods, and key amenities affecting housing prices.
- Employed Linear Regression, Decision Trees, Random Forest, and Gradient Boosting Regressors, with Explainable Boosting Machine (EBM) for interpretability, and applied XAI techniques (LIME, SHAP) for model transparency.

Education

Ahsanullah University of Science and Technology Dhaka, Bangladesh
B.Sc. in Computer Science and Engineering, CGPA: 3.63/4.00 *2023*

St. Joseph Higher Secondary School Dhaka, Bangladesh
Higher Secondary Certificate (HSC), GPA: 5.00/5.00 *2018*

Career Track Certificates

Senior Data Analyst Career Track 2025
365 Data Science, 10 courses – Link: https://learn.365datascience.com/certificates/DD-04C2CEC942/
Skills: Data-Driven Decision Making, Advanced SQL, Business Insight Generation, Data Visualization, A/B Testing, Growth Strategy

Business Analyst Career Track 2024
365 Data Science, 10 courses – Link: https://learn.365datascience.com/certificates/DD-A4B537B107/
Skills: Business Process Analysis, Data Strategy Development, Advanced Excel & Data Analysis, Statistical Analysis for Decision Making

Applied Data Science I: Scientific Computing & Python 2021
WorldQuant University, 4 modules – Link: https://www.credly.com/badges/802cfcb2-f0e0-42b1-8cf4-07c15387ab2e/public_url
Skills: Statistical Analysis, Hypothesis Testing, Data Manipulation (CSV, JSON), Python (NumPy, Pandas), SQL, Data Analysis, Data Processing

Online Courses

MCPs for Everyone: Supercharge Your AI Tooling Skills 2025
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-FC9BB8A245/
Skills: Model Context Protocols (MCP), AI Agents, Tool Orchestration, MCP Development, Cursor, Claude, Python

Data-Driven Business Growth 2025
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-07FD53D8AD/
Skills: Business Intelligence, Data Visualization, DAX Writing, Dashboard Creation, Data Modeling, Data Transformations

Power BI 2023
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-4DED1F76F3/
Skills: Business Intelligence, Data Visualization, DAX Writing, Dashboard Creation, Data Modeling, Data Transformations

SQL + Tableau + Python 2023
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-32E1AA19FD/
Skills: Data Cleaning, Preprocessing, Visualization, Machine Learning, Relational Database Management, Business Intelligence

The Complete Data Visualization Course with Python, R, Tableau, and Excel 2023
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-2F351CEAA2/
Skills: Data Visualization, Data Analysis, Business Intelligence (BI), Dashboards, Charts

Data Analysis with Excel Pivot Tables 2023
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-2E170508B8/
Skills: Pivot Tables, Conditional Formatting, Power Query, Power Pivot, Data Filtering, Data Structures, Data Analysis, Data Preprocessing

Machine Learning in Python 2021
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-24D0A216B4/
Skills: Predictive Modeling, Data Analysis, Machine Learning Application & Algorithms, Scikit-Learn, Decision Theory

Statistics 2021
365 Data Science – Link: https://learn.365datascience.com/certificates/CC-1391870348/
Skills: Fundamentals of Statistics, Hypothesis Testing, Data Analysis, Inferential Statistics, Quantitative Analytics
